STRENGTHEN YOUR PASSWORDS: KEEP YOUR ACCOUNTS SECURE!

STAY ONE STEP AHEAD OF HACKERS!

Learn how to create strong passwords, avoid common mistakes, and enhance security with multi-factor authentication.

WHY STRONG **PASSWORDS MATTER?**

- 80% of cyber breaches are due to weak passwords.
- 123456 and Password123 are still the most commonly used passwords!
- A hacker can crack an 8-character password in less than 8 hours!

No of characters	Time Duration					
6	Instantly cracked					
8	8 hours					
10	1 week					
12	5 years					
16	Over 1,000 years!					

THE DO'S & DON'TS OF **PASSWORD SECURITY**

10	1 week		DO		DON'T	
12	5 years		Use long passwords (at least	×	Use the same password for multiple accounts.	
16	Over 1,000 years!	•	12+ characters)			
	/S. GOOD ORD HABITS	 Image: A start of the start of	Include uppercase, lowercase, numbers, and symbols		Share your password with anyone.	
Bad Passwords	Strong Passwords	~	Use passphrases (e.g., HorseBattery\$Tabl	×	Use easily guessable passwords (e.g., yourname123)	
123456	T@bl3Ch@ir\$un5et!		e123!)			
password	D0gRun\$5Mil3s.	<	Enable multi-factor authentication (MFA)	×	Write down passwords on sticky notes	
qwerty123	`9Rain&CloudSky`		Use password		Click on links in	
companyname12 3	Xy#73&Zqw\$@8	~	managers to store complex passwords	×	emails asking you to reset your password unless verified	

COMPANY PASSWORD POLICY (QUICK OVERVIEW)

Minimum 12-character passwords required.

Passwords must be updated every 90 days.

Multi-factor authentication (MFA) is mandatory for all accounts.

Company-issued password managers must be used for storing credentials.

Report any suspicious password reset requests to IT immediately.

PASSWORD POWER-UP: CROSSWORD CHALLENGE!

Think you know your password best practices? Put your knowledge to the test with this fun crossword puzzle!

Each word is a clue to keeping your accounts secure. From must-know terms to common mistakes, this game is your chance to brush up on what makes a strong, safe password.

Complexity, TwoFactor, Unique, Passphrase, Breach, Lockout, Manager, Authentication, Credential, Secure, Update, Symbols, Length, Guessing, Reuse, Encryption

PASSWORD SAFETY

Use MFA whenever available

Change compromised passwords immediately

Use unique passwords for every account

Be cautious of phishing attempts asking for password resets

Use company-approved security tools to store passwords securely
